Muhammad Talha

Frond-End-Developer

Profile

As a front-end developer with 1 years of experience, I specialize in React.js, Next.js, and GraphQL for building dynamic web applications. Skilled in REST API integration and proficient in JavaScript, I ensure clean and efficient code. My expertise extends to UI development with Tailwind CSS, utilizing Storybook for component design and Jest for robust testing. Eager to contribute to innovative projects and collaborate in dynamic teams for exceptional digital experiences.

Work Experience

2023 - Present

FocusIT Services | Civic Center Bahria Town Rawalpindi Pakistan,

I have demonstrated strong skills and expertise as a frontend developer. My proficiency in HTML, CSS, and JavaScript has been instrumental in creating visually appealing and user-friendly interfaces. I have made unlimited projects using these all languages and also clients project. I have successfully collaborated with design teams to bring their concepts to life and ensured seamless integration with backend systems. I have a keen eye for design details and a commitment to delivering high-quality user experiences across different devices and browsers. Additionally, I have kept abreast of industry trends and emerging technologies, adapting my skills to incorporate best practices and optimize website performance. My problem-solving abilities and knack for troubleshooting have been valuable assets when encountering challenges in the development process.

1.**HTML/CSS/JavaScript:** Proficient in creating structured and semantic markup for web pages and skilled in building responsive and accessible layouts for various devices

2.**Responsive Design:** Frontend developers should be skilled in creating designs that work well on various devices and screen sizes. This often involves using media queries and flexible grid layouts.

3.**Frameworks and Libraries:** Knowledge of frontend frameworks and libraries can significantly boost productivity. Popular frameworks include Bootstrap, Tailwind and SASS . Libraries these can be very useful.

08/2023 - 11/2023

Software System | Johar Town Lahore Pakistan,

As a Front-End Developer at Software System pvt Limited, I was instrumental in shaping exceptional user interfaces for various projects. Leveraging React.js and Next.js, I led the design and implementation of visually stunning interfaces that enhanced user engagement. Beyond UI development, my role involved integrating GraphQL APIs to deliver seamless data interactions and improve overall application performance.

I specialized in creating sleek user interfaces using Tailwind CSS.

Despite being in the early stages of my career, I quickly gained proficiency in integrating REST APIs for efficient data interaction within applications. This experience not only honed my technical skills but also cultivated a strong commitment to delivering quality results within a collaborative team environment.
